Education

2018–2024	**Ph.D.**, *The University of Texas at Austin (UT Austin)*, Austin, TX, USA.
	Software Engineering and Systems Advisor: Milos Gligoric
2014–2018	**B.E.**, *Beijing University of Posts and Telecommunications (BUPT)*, Beijing, China.
	Telecommunication Engineering

Industry Experience

Feb 2024–Present	**Research Scientist**, *Meta Platforms*, Menlo Park, CA, USA.
	Worked on AI infra efficiency.
May–Aug 2023	**Software Engineer Intern**, *Uber Technologies*, San Francisco, CA, USA.
	Supported contracts in a Go static analyzer called NilAway (`https://github.com/uber-go/nilaway`) to reduce false positive errors.
May–Aug 2022	**Software Engineer Intern**, *Meta Platforms*, Bellevue, WA, USA.
	Migrated a large-scale data analytic engine onto a new environment to improve performance and maintainability.
May–Aug 2020	**Research Intern**, *Fujitsu Laboratories of America*, ~~Sunnyvale, CA, USA~~ Remote.
	Improved software program repair examples by minimizing buggy/fixed pairs of programs.
Jul–Aug 2019	**Software Engineer Intern**, *NIO*, Beijing, China.
	Developed and improved a physical and visual simulator for autonomous vehicles (Unreal Engine).

Selected Projects

JAttack `https://github.com/EngineeringSoftware/jattack`
A template-based compiler testing framework that 1) accepts as input a template Java program written in a domain-specific language in Java; 2) executes the template to generate concrete programs and 3) tests Java JIT compilers using the generated programs. JavaParser, OW2 ASM, DSL, JIT, Java. Team Project. Discovered CVEs: CVE-2020-14792, CVE-2022-21305, CVE-2023-22044, CVE-2023-22045.

JOG `https://github.com/EngineeringSoftware/jog`
A framework that facilitates developing Java JIT peephole optimizations: 1) accepts as input a pattern written in the same way that tests are written; 2) translates the pattern into C/C++ code as a JIT optimization pass, and generates Java tests for the optimization; 3) detects shadow relation between a pair of optimizations. JavaParser, Z3, DSL, JIT, Java. Team Project. 7 pull requests have been integrated into the master branch of OpenJDK.

VeDebug `https://github.com/EngineeringSoftware/VeDebug`
A Java debugging tool that 1) automatically sets breakpoints where the current execution diverges from the previously captured one, and 2) provides video player features e.g., speed up/slow down the replay. Bytecode instrumentation(OW2 ASM, javaagent), Java. Team project.

Technical Skills

- Programming Languages: Java (everyday), Bash (everyday), Python, C, Go
- Tools: Emacs (everyday), Git (everyday), OW2 ASM, JavaParser
